

Expand coaching capacity and unlock your teachers' growth potential.

Research consistently shows that job-embedded coaching is the most effective means of transforming daily practice. So how can districts expand the impact of their internal coaching staff so that more teachers receive and benefit from ongoing support and growth?

The **e2L Coaches Academy** is an immersive professional learning solution that trains and certifies your instructional coaches to implement our highly-efficient coaching system proven to help teachers feel more confident and supported to accelerate learning for students.

- ✓ **Identify and address coaching strengths, challenges, and gaps**
- ✓ **Certify your coaches on how to conduct job-embedded, evidence-based conversations**
- ✓ **Manage, document, and organize all coaching interactions with GroweLab**
- ✓ **Analyze coaching data to quantify the impact your coaches are having**

Start Partnership at
engage2learn.org

At engage2learn, we're on a mission to help the neighborhood public school be the first choice for every family. Since 2011, we've partnered with K-12 education leaders to upskill talent, streamline systems and accelerate achievement. Our talent development systems, rooted in rigorous academic research and on-the-ground coaching experience, consistently link adult learning to tangible results in public school districts nationwide. We help our partners create schools where leaders love to lead, teachers love to teach, and learners love to learn.

Everyone wants a **coach**.
No one wants a **critic**.

What if coaching conversations were **PERSONALIZED** to each teacher and contained strategies that accelerate learning in their classrooms?

Coaches learn how to facilitate job-embedded conversations using research-based professional learning standards and rubrics that lead to growth and mastery in core competencies.

What if your coaching approach was **ORGANIZED** to support nearly 4X as many teachers?

On average, coaches who follow our process with fidelity can coach as many as 70 teachers in a year vs. 19 teachers using other coaching methodologies.

What if leaders had visibility into how **EFFECTIVE** coaching is at improving educator and student outcomes?

Coaching and growth data is captured and analyzed in GroweLab to ensure instructional coaching results in quantifiable outcomes through individual, campus, and district reporting.
