

How do you know if your learners are life ready?

We all want our learners fully prepared for life beyond school walls, but how do you know when your students are truly life ready? Educators simply do not have the tools to measure this all-too-important component of a student's learning experience. Because of this, engage2learn (e2L) is now offering a suite of tools to help educators measure, assess, and analyze the growth and mastery of life ready skills in their learners.

The 7 e2L Life Ready Skills

The e2L Life Ready Skills are based on the most up-to-date scholarly research on the skills employers repeatedly say are most critical to succeed and thrive in the workforce. Taken together, these skills help prepare your learners for an unpredictable future.

Creativity Strands

- ✓ Brainstorming
- ✓ Originality
- ✓ Feedback

Each life ready skill breaks down into strands that describe key behaviors exhibited as part of the skill.

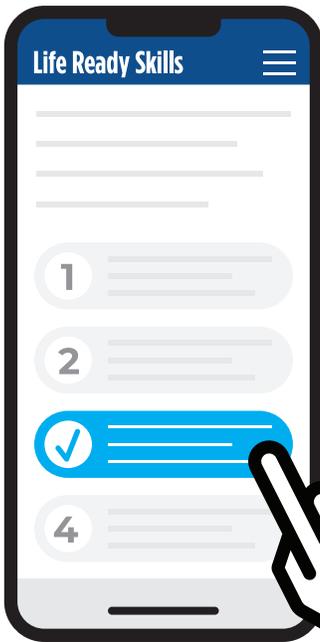

Life Ready Skills Rubrics & Tracking Tools

Each of the seven Life Ready Skills are codified in a 4-level rubric with clearly defined behaviors at each level. Each rubric helps learners know exactly what the skill looks like in practice and how to chart a pathway to master the skill. In addition to differentiated rubrics, e2L has also developed Life Ready Skills trackers for students to use to self-assess and track their growth in each skill.

★ Initiating Progress	★★★ Approaching Expectation	★★★★★ Meeting Expectation	★★★★★ Exceeding Expectation
✓ _____ ✓ _____	✓ _____ ✓ _____ ✓ _____	✓ _____ _____	✓ _____ _____

Life Ready for All Ages!

e2L offers differentiated rubrics & trackers for K-2, 3-5, 6-8, High School, and Adult Learners.

Life Ready Skills Assessment App

e2L has developed a perception assessment to provide key insights on the student's growth in Life Ready Skills. This short, 20-minute assessment is typically given to students twice; once at the beginning of the year and once at the end. During the assessment, students self-reflect on their application of Life Ready Skills based on given statements. Each statement is correlated to a Life Ready Skill and a leveled growth indicator, so that assessment data will show overall perception of proficiency in each of the Life Ready Skills. Each Life Ready Skill is broken down into sub-topics, called strands, so districts can target specific areas of the skill as needed.

Assess on the 7 e2L Life Ready Skills or customized skills and strands aligned to your district learner profile.

Assess growth for whole district or campus

Life Ready Skills Growth Reporting

Data collected from the Life Ready Skills Assessment App is compiled into detailed growth reports that allow districts and/or campuses to analyze and measure their students' progress toward skill mastery. Equipped with quantitative and granular data on growth, these reports provide educators key insights into areas of the growth and need for their students. Educators are then able to adapt instructional methods to provide targeted support that better suits the needs of their students.

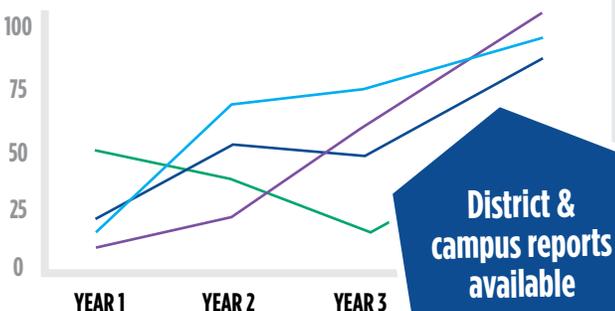

Pricing Info:

12¢ / student

Includes two test administrations & growth reporting. \$750 minimum.

Multi-year LRS assessments are turned into longitudinal growth reports.
